

High Lift Container Discharger with Track System

Application Details:

NBE CSO: E341934047

Material: Film Trim

Bulk Density: Varies

Particle Size: Chunks

Flowability: Free Flowing

Area Classification: General Industrial

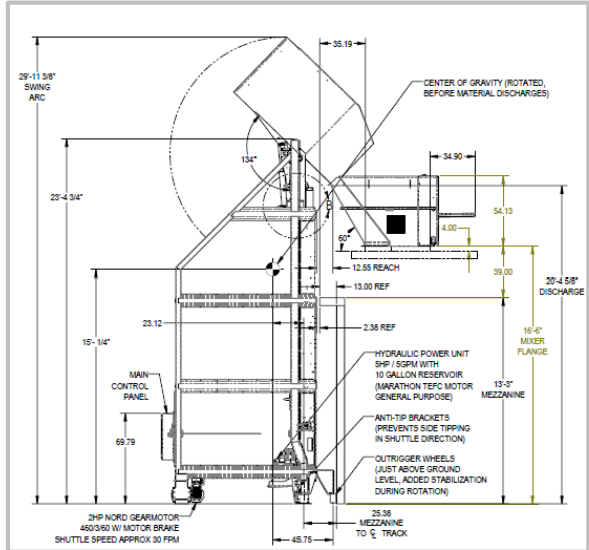

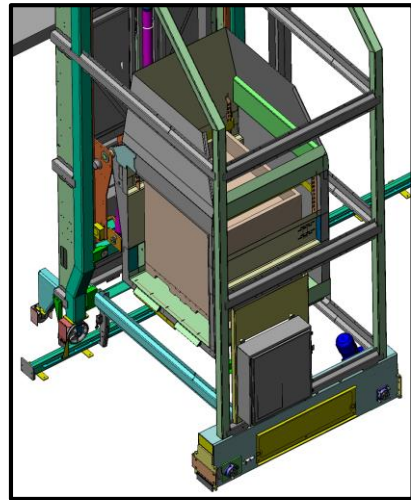

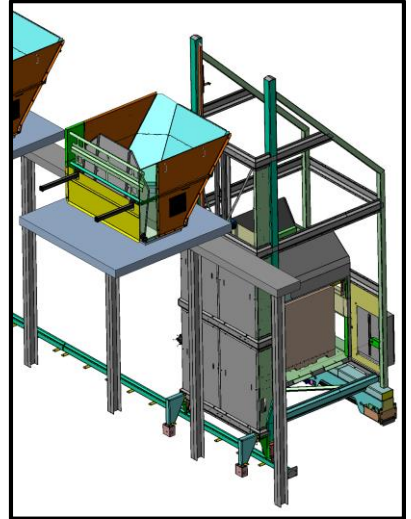

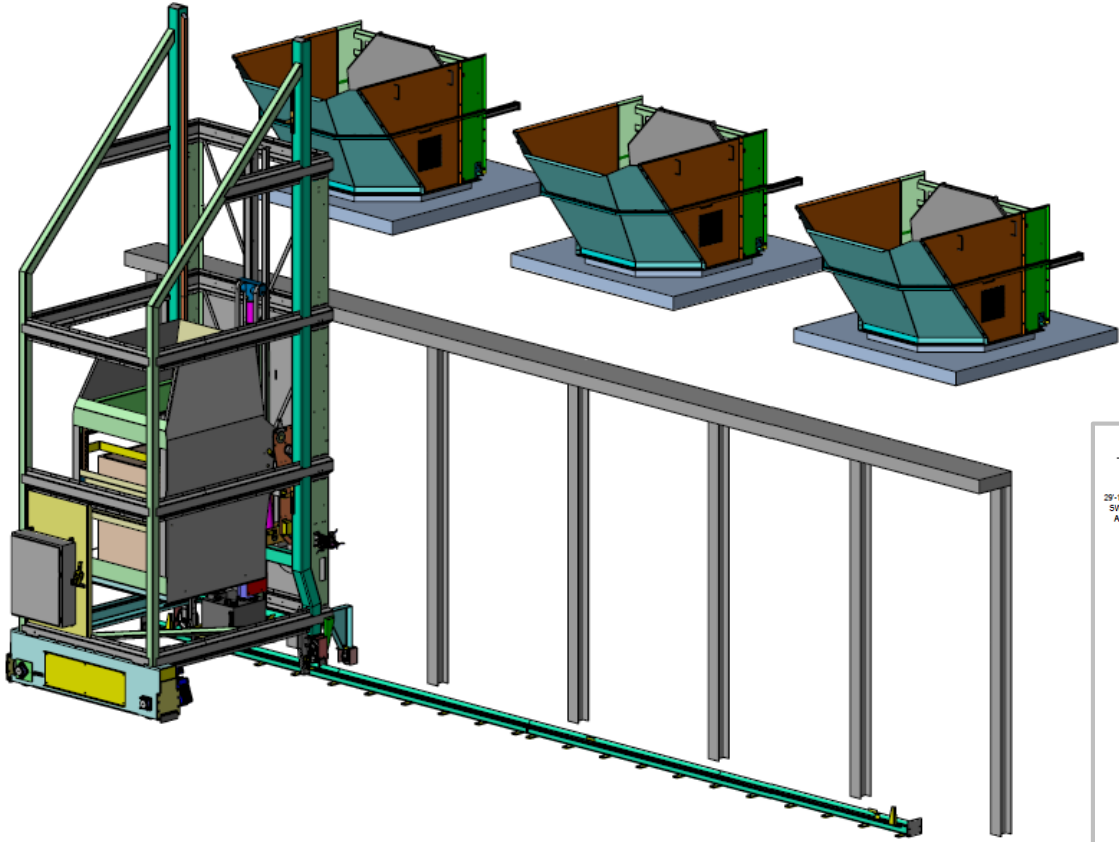

Target: Qty (3) Separate Mixing Tanks @ 20'-4 3/8" from floor

Clean Procedure: Dry Wipe

Application Overview:

Customer needed a high lift container discharger for a reprocessing system for their products. The materials for reprocessing needed to be discharged into three separate tanks. A custom designed high lift discharger with motorized track system was designed to utilize one discharger to feed materials to all three tanks. Controls were provided to move the discharger on the track system and allow the operator to designate which tank to target.
