NBE's **REAL** RESULTS

Lift and Seal Drum Dumper with Integrated Flexible Screw Conveyor

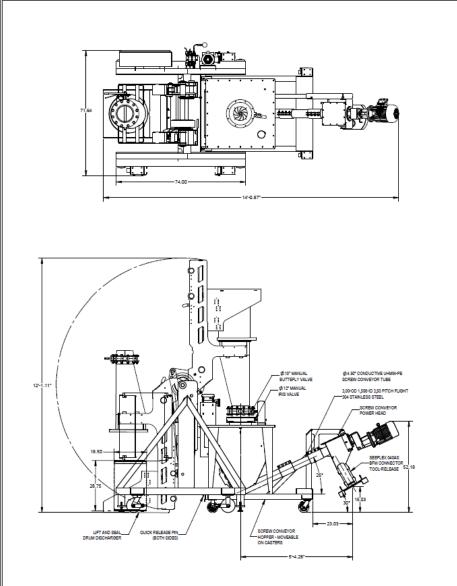

Application Details:

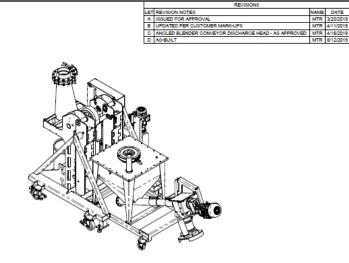

NBE CSO: E901890025 Material: H3 Aluminum & AP Powders Bulk Density: 46.2 PCF, AP: 68.7 PCF Particle Size: Powders Flowability: Semi Free flowing Area Classification: General Area Clean Procedure: Washdown – low water pressure

Application Overview:

Customer required a drum discharger and portable screw conveyor to contain dust while discharging and conveying. The area was rated general area, but the material is considered an explosive, so the system utilized anti-static tubing for the conveyor and was bonded and grounded.

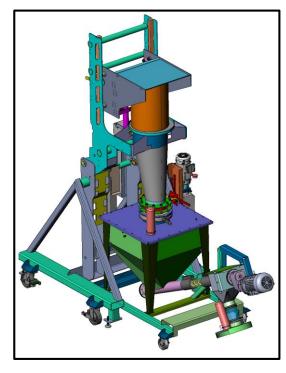

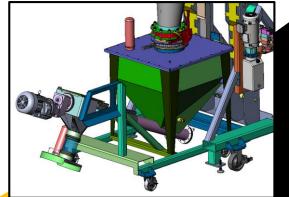

Material Name: H3 Aluminum & AP Powders Bulk Denoty AL: 40.2 PCF, AP: 68.7 PCF Particle Size AL: Unknown, AP 20 um and 200 um Flowability semi-free flowing

Electrical Supply: 460 VAC / 3 Ph / 60 Hz Control Voltage: 24 VDC Enclosures: NEIJA 4V Weshdown Procedure: Vischdown - low water pressure Area Classification: General Area
