

Packaging Stand

Application / Equipment Details:

- NBE CSO: E272427004
 - Material: Glass Filled Poly Pellets
 - Bulk Density: 40-50 PCF
 - Particle Size: 1/8" Pellets
-

Application Overview:

This loyal customer has been running various NBE systems over the years, including a similar packaging stand to this project. The system will allow the customer to fill both bags and containers with glass filled poly pellets. We feature a large surge bin with 80 cubic feet of capacity, filling station with connections for both bags and container, three operator platforms and integrated controls to work with both NBE and customer provided equipment.
