## **Real Results** Application OVERVIEW

## Surge Bin

## **Application / Equipment Details:**

- NBE CSO: E501750198
- Material: Pelletized plastics
- Bulk Density: 35 lbs/cubic foot
- Particle Size: Approx 1/8"
- Flowability: Free Flowing
- Surge Bin Usable Volume: 458 cubic feet

**Application Overview:** NBE's complete line of Surge Bins are designed to provide economical in-plant storage of bulk raw materials. The Surge Bin allows the raw materials to be centrally located and distributed to several locations within the plant, saving conveying line from remotely located silos.

NBE surge bins can be equipped with a wide variety of configurable options including access hatches with filters, multiple loader mounting locations, drain tubes, slide gates, and vacuum pickup probes. Larger bins and multiple bin systems can be equipped with ladders and safety cages.
